# Security Solution Design

*We are experienced in the design and installation of integrated, layered security solution that incorporate human, technical, physical and procedural elements.*

DCPL employs highly experienced specialist consultants to design and integrate security solutions into your business. We believe that security should enhance the business ability to operate. It should enable operations and contribute to the bottom line. We regard security as a contributor to business resilience and profitability rather than a cost centre.

Our solution design is based on well-established industry best practice honed to perfection in an increasingly challenging operating environment. We pride ourselves that we always remain conscious of the client's operational posture and profile and concentrate on designing bespoke systems that are not just commensurate with the risk, but also compatible with the corporate culture.

DCPL will design solutions that are fully integrated into and across the various departments of the business. Our solutions will comprise of human security; including vetting, training, awareness, security culture and of course guarding; technical security, including access management systems, surveillance systems, intruder detection systems and illumination systems; physical security, including barriers, entry portals, structural hardening and security landscaping and procedural security; including access protocols, handling of sensitive information, incident reporting, compliance, stock handling and accounting procedures.

DCPL has experience across a broad range of industry sectors, and various operating environments. Our solutions are designed to be cost effective, efficacious and compatible with other risk reduction strategies, including Corporate Social Responsibility and Corporate Communications. We will always look at ways that risk can be reduced using pre-existing capability within the business. Thus we reduce the financial impact of the solution and engender an enterprise-wide, participative security culture.

*An intellectually based approach integrating proportionate and appropriate risk mitigation measures into corporate planning*

Our consultants all have industry standard qualifications. Many of them will have American Society of Industrial Security board certifications. In ensuring that our consultants are familiar with the latest best practice and technological developments, we remain confident that we can offer a solution design that is second to none.

# Executive Protection and Journey Management

We are a leader in international medical, security and travel assistance services, we draw up foreign situation advisories, provide logistical support, screen transportation services and track personnel hours-on-duty, road and weather conditions. Our Operations Centre is manned by highly trained crisis response experts.

## **Executive Protection**

While it is impossible to predict the future with certainty, DCPL can assess the likelihood and impact of risks inherent in clients travel itineraries. We have provided measured and appropriate cost-effective services for a variety of travellers, from school teachers, NGO staff and expatriate operatives to multinational executives in West Africa.

Our Executive Protection specialists are expert in the provision of discreet security solutions: Services range from a reliable transport solution; a vehicle to collect travelers unfamiliar with their destination to a security trained driver or a dedicated Security Consultant.

Where we do not have our own in-country staff we provide personnel from our network of vetted, reliable and safe local partner companies. Clients, visiting a country where there are security considerations, can be briefed prior to travel, advised on what to expect and what precautions they may need to take, also clients receive individually designed project plans

Any Security Consultants provided in-country have a clear understanding of the current situation and valuable local knowledge. Our Intelligence Analysts can provide a full country or city background briefing and up-to-the-minute intelligence throughout the visit

Executive Protection and Journey Management planning is proportionate to security needs with professional Travel Risk Management stakes provided, which are appropriate to the situation and flexible, thereby reducing the risks of the client becoming a victim of crime or violence.

We have significant expertise in preparing journey and crisis management plans as well as assisting clients to recover from hazardous and potentially volatile situations: Our operational personnel are chosen for their proven flexibility under challenging conditions and are supported by our Information

Services team & analysts.

Support available from the DCPL 24/7 Response Centre:

- Pre-Travel Advice for security and personal safety
- Emergency Notification Service allowing travellers to be better prepared
- Travel Security Advice
- Geo-fence and tracking solutions monitored
- Emergency Medical Referrals
- A trained Crisis Management Team

# Executive Protection and Journey Management

*Appropriate measures to keep international travelers safe, mitigating risk to within corporate or personal tolerances*

Ensuring safe passage for your personnel wherever they are in the World is essential to support safe travel plans, mitigating risk and meeting corporate Duty of Care obligations. Personal safety is made more complex when operating in emerging markets and challenging environments.

DCPL currently provides Executive Protection and Journey Management services throughout Nigeria and neighboring countries. We support client business activities, ranging from high risk, high profile security needs through to discreet security coverage at low profile events or venues. We design and implement appropriate bespoke solutions for each client requirement, based on analysis of threat, vulnerability and the resulting risk levels.

DCPL is a leading business risk consultancy, committed to protecting personnel, assets, profits and reputation. A trusted adviser, we provide intelligence led, technology enabled security risk and crisis management solutions that embrace cultural diversity regardless of origin.

Experienced in the design of Executive Protection and Journey Management programs, we deliver cost-effective, flexible and reliable services for a broad range of clients traveling in high risk environments and developing regions.

*DCPL offers a full complement of Journey management security and risk services to help ensure the safety of your personnel.*

It doesn't matter whether business takes you to a location that is known for high crime or you are a high-ranking personnel who may be a target of potential crime, DCPL will be there to protect you. We offer the protection, including medical assistance if required.

## Offshore Projects Security

*Complex security solutions in challenging environments that comply with international standards and corporate governance to protect offshore installations and infrastructure*

DCPL works with numerous multinational companies operating within the Oil, Gas and Energy sectors. We create safe and secure environments, with protection from piracy and criminal activities, for onshore and offshore installations and infrastructure.

We fully understand the critical need for proportionate security strategies to enable our clients to operate in challenging environments. We have developed a deep understanding of the complex nature of offshore project security and the significant accompanying financial, logistical, HSSE and physical demands experienced by our clients, their suppliers and support network.

The leading provider of maritime security solutions to the Oil & Gas industry operating off the coasts of West Africa, we provide intelligence led, technology enabled security risk and crisis management solutions in support of large dynamic offshore exploration; seismic survey, drilling and cable/pipeline laying operations. Our Offshore Project Security teams are experts in providing bespoke, flexible solutions that embrace cultural diversity regardless of origin.

With a significant number of major offshore projects completed safely and successfully in the Gulf of Guinea, we have accumulated many thousands of man days' experience and enabled our clients to operate without any loss of production time due to security

# Offshore Project Security

## **Incidents or related issues.**

The protection of offshore projects whether exploratory drilling, seismic surveyor pipeline and cable-laying requires careful planning and the coordination of all stakeholders; primarily the operator or contractor, the security company and the military or police agencies from the country in whose territorial waters or Exclusive Economic Zone (EEZ) the project is being conducted

## **We build on the following key components:**

- Effective operational delivery
- Compliant regional support network
- Experienced and commercially focused executive management
- Reliable onshore representation
- Proactive command and control

## **Working with Host Nations**

One of our most important roles is to liaise between the company responsible for delivering the task and the country's military or police personnel directed to protect territorial waters. This role sees us working with Host Nation forces to ensure they are familiar with the unique requirements of the offshore industry, and with the Oil & Gas companies and Support Vessel providers to ensure they have confidence in the security measures being put in place to safeguard them as they conduct their business. We have worked alongside many different Navies and Coast guards.

## **Driving Standards of Health Safety Security & Environment**

We integrate with our clients' operational requirements and build the combined safety and security standards required to deliver a successful solution. With our relentless focus on Health & Safety we have embedded a strong safety culture among our worldwide workforce. DCPL procedures are fully compliant with the OGP 432 standard and our fully documented and transparent HSSE processes are designed to give clients' confidence that we can operate safely in, on and around their own critical processes

## 24/7 Response Centre

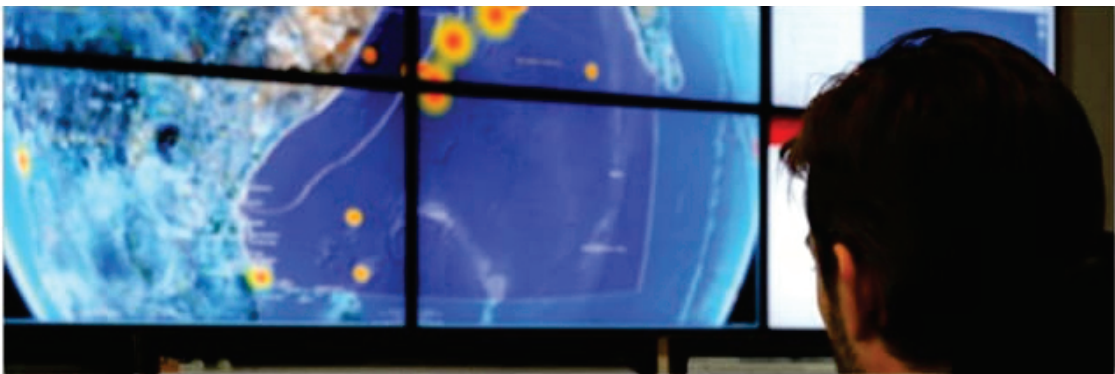

**Our highly experienced team provides a calm measured response during times of crisis**

The World can change in an instant as challenging events unfold; robust plans, rapid reaction and proactive measures are often required to maintain the safety and security of our clients' personnel and assets.

Our Response Centre manages hundreds of communications every day and provides coverage for the whole of Nigeria. We deploy the latest technology and support it with an excellent human network throughout the country and the wider region. We have the capability to manage emergencies on land and at sea, delivering peace of mind to our clients.

DCPL is a leading business risk consultancy, committed to protecting personnel, assets, profits and reputation. We provide intelligence led, technology enabled security risk and crisis management solutions to a number of leading international companies, government agencies and private clients globally.

Our information, Travel & Response (ITR) teams are recognized experts in delivering a highly responsive and proactive resource in challenging and demanding situations. With significant expertise in post-conflict and developing regions, our bespoke, flexible and fully supportive security solutions embrace cultural diversity regardless of origin.

### **Ops Centre Response Centre**

DCPL deals with both onshore and offshore based emergency response incidents, providing support, coordination and guidance. Located in our Lagos head office, OpsCentre is manned by highly skilled controllers who utilise a variety of technologies and systems that deliver an effective 24/7 communications, tracking and monitoring capability of personnel and assets.

## 24/7 Response Center

Our regional Response Centre provides frontline support for client operations proportionate to their Security needs. For corporate travellers and employees residing abroad, OpsCentre can assist with:

### **Pre-Travel Advice**

In-depth pre-travel security and personal safety advice from the OpsCentre team, available at the end of the phone 24/7.

### **Emergency Notification Service**

Our Response Centre proactively sends out situation awareness alerts, which includes bulk messaging to international travelers and expatriates so they will be better prepared for taking appropriate, emergency actions. We can impart key and critical information rapidly and simultaneously to a large number of recipients in a variety of locations.

**Travel Security Advice** During any period of uncertainty or tension, one call to our multilingual Response Centre gives immediate access to protection advice and well-informed 'next steps'.

### **Emergency Transportation and Security Escorts**

Immediate concerns in-country can often be addressed through highly-qualified local assistance that our Response Centre can facilitate.

### **Evacuation Coordination**

OpsCentre will coordinate all aspects to ensure the safe evacuation of personnel out of high-risk environments in what are often rapidly deteriorating conditions.

### **Kidnap for Ransom Support**

We have access to highly Specialized K&R consultants whose utmost priority is securing the victim's safe release with minimum disruption and financial loss to the family or company.

### **Emergency Medical Referrals**

When an emergency is of a medical nature, OpsCentre can be your travelers' one-call helpline for identifying appropriate resources.

**Effective and experienced response when you need it**

# Security & Intelligence Training

The DC Premium Training Academy (DCPTA) is a new venture that draws on more than a decade of experience in the provision of training in a range of security subjects to clients across West Africa. Our training experience includes delivery of training to previous employers in-house and also the delivery of high quality training courses on behalf of a well-established security management training provider.

DCPTA offers a range of training solutions that can be delivered either at your own facility or at a training venue arranged by us. We also have a number of partnerships with world class trusted training delivery companies and sub-contractors. The latter have extensive experience of working and living in Africa.

## Products and Services

DCPTA offers a mix of courses that are generally tailored to the operating environment in Nigeria and West Africa generally. We have developed a number of courses that have no Equivalent in the market. Many of the courses will generate capability that is portable across geographical or sector boundaries.

### The Academy offers full range of courses including the following:

- **Intelligence Skills- Developing Intelligence Capability in the Corporate Environment**
- **Intelligence Skills -Analysis Mechanics**
- **Intelligence Skills - Intelligence Product Drafting Skills**
- **Intelligence Skills - Networked Information Elicitation**
- **Security Skills - Oil and Gas Sector Security Management**
- **Security Skills - Introduction to Security Management**
- **Security Skills - Corporate Protection Against Explosive Devices**
- **Hostile Environment - Nigeria, Security Awareness, Situational Understanding and Personal Security Briefing**
- **Hostile Environment - Survival in Kidnap and Hostage Situations**
- **Hostile Environment - Surveillance Awareness and Counter Surveillance**
- **Hostile Environment - Nigeria Specific Mobility Package**
- **Management Skills - Scenario Generation and The Planning Cycle**
- **Corporate Social Responsibility & Security Skills - Influence Operations Planning**

Although the DCPTA is a new venture, a number of our courses will be submitted to the accreditation process with a UK accreditation body, either Edexcel or Skills for Security in coming months. It is likely that they will attract level 4 award status.

Our evolving DCPL Training Academy offers high quality courses that can be tailored to a specific client's requirements. We carefully select our course subjects and content as well as our trainers. All our trainers will have relevant experience in the subject they are delivering. Our training philosophy is that training and education are best acquired by the learner. Therefore our trainers will lead the learner through a process of discovery rather than learning by rote.

# Security Information Services

DCPL offers a comprehensive range of routine and bespoke security information products and services. These services have been developed as a result of many years' experience in the generation of intelligence support to top decision makers in both the government and private sectors.

Our focus is on delivering Situational Understanding. We do not believe that situational awareness goes far enough. We appreciate that our clients need to have a detailed understanding of what is happening in their operating environment that is relevant to their business. Therefore, we strive at all times to answer the "So what?". question that arises when a decision maker is informed of an event of trend in the operating environment.

## How are we different to our competitors,

- DCPL's Information Services Team (IST) is **Independent**. Central to the DCPL IST philosophy is objectivity. Unbiased Independence is critical when assessing information. The IST is not established to be or used as a marketing tool by our operations staff. By remaining independent, we hope to gain your trust in the integrity of our analysis and recommendations.
- We strive to remain **Relevant**. We provide clear, concise, relevant, accurate and timely risk forecasting that will impart understanding to the client to help them make informed and timely decisions. In many cases this will be generated on a bespoke basis, ensuring that the intelligence products are wholly relevant to the specific client operational footprint or project plan.
- We generate **Clarity**. Clients need crisp, short, business-relevant reports that are easy to assimilate and understand. Our reports are written as corporate documents. We don't use journalistic writing.
- In order to ensure we develop a true understanding of the operating environment in Nigeria, we draw on **Local Wisdom**. Our analysts and operators are recruited locally and trained to International standards. They offer an intimate, unbiased understanding of local issues. They understand the drivers at local level that shape the operating environment.
- We follow a Systematic Process. We have a unique nation-wide, reliable and well-placed source network that can respond quickly to your information requirements. We can collect, collate, link, evaluate and visualise information systematically to reveal slight changes in the operating environment that could impact your business

## Products and Services

DCPL offers a range of products and services that can be selected by the client based on their own requirements. These services can be packaged together and offered as bundled products that will attract competitive pricing advantages

### Our products and services include:

- Risk Alerts
- Risk Information Analysis Reporting
- Security Threat & Vulnerability Assessments
- Corporate Social Responsibility Consultancy

# Maritime Security

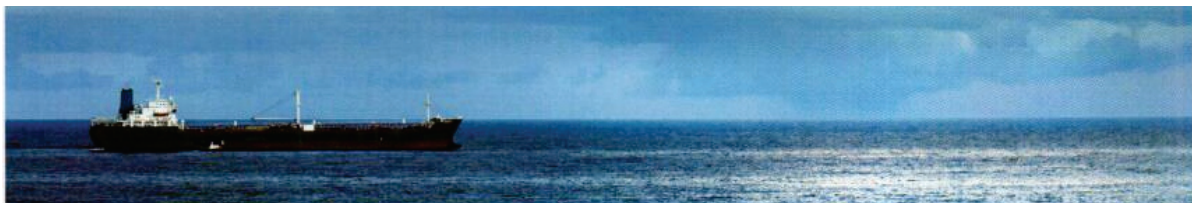

## Protecting vessels with a range of anti-piracy and maritime security consultancy services

DCPL is a premium provider of security services to the maritime industry; supplying a comprehensive set of risk mitigation solutions to the international shipping community.

We understand the complexities within the maritime industry and the challenges facing our clients; financially, legally and ethically. Our expertise has helped crews to stay safe, led to lower insurance premiums and assured stakeholders that their personnel and assets are secure.

DCPL is a leading business risk consultancy, committed to protecting personnel, assets, profits and reputation.

We provide intelligence led, technology enabled security risk and crisis management solutions. A trusted adviser in the provision of anti-piracy and maritime security, our consultants-operate in the most efficient and effective way possible and embrace cultural diversity regardless of origin.

Our maritime protection measures reflect our extensive and significant experience gained from a number years of delivering maritime security services to the oil & gas industry, along with the wider shipping community.

### Maritime Security

Supported by the capability and experience of our dedicated 24/7 Response team, our maritime security services include:

- Maritime Business Intelligence
- Maritime Risk Analysis
- Risk Assessments and Security Plans
- Vessel Security Reviews
- Competent Authority (SSAS Testing) Kidnap and Response Consultancy

DCPL operates in full compliance with IMO guidelines; taking a lead role in driving standards and in the ethical and professional delivery of security and risk management services.

We are committed to the robust consideration of the Human Rights impact of private security and the raising of standards internationally.

## Providing piracy risk mitigation for your crew and vessel
